

THE ALL NEW TITAN 200

Titan Slicer Limited is a world leaders in food processing technology with its innovative New Zealand engineering and cutting edge industrial design. The Titan 200 Slicer offers all of the key features and quality components of the larger Titan Slicers, however its smaller size, and price to match, make it the best value option for the mid range processor.

Patented loading system for unbeatable hygiene

Widest throat for the biggest range of products

Automatic gripper for easy loading and unloading

“The slicer with the smallest footprint and the biggest throat on the market today”

TITAN 200 SPECIFICATIONS

- Slicing aperture dimensions 160 mm high x 360 mm wide
- Can slice multiple products
- Servo driven ball screw gripper
- Automatic Product load
- Automatic gripper
- Automatic End waste removal
- Auto tension of product while slicing
- Maximum product length 917 mm (standard configuration)
- Supplied as standard with a universal gripper feed chute suitable for numerous product options. Specific product feed chutes are available including a clamp chute for fish or other non-uniform products.
- Blade diameter 350 mm
- Twin motor orbital blade system independently controls head and blade speed providing high accuracy slicing on the most demanding products over a wide temperature range
- Slicing speed 40 to 400 head revolutions per minute
- Slice thickness 0.5 – 20 mm, (product dependent)
- Maximum blade speed 2000 revolutions per minute
- Ten auto program settings configured and accessed through the operator friendly touch screen control panel
- Blade sharpener
- Easy clean rugged stainless steel construction for food safety
- Integral portioning conveyor counts slices in-group, stacked or shingled configurations
- Suitable for a wide range of deli products
- Single person operation
- Conveyor belt is high tech thermoplastic fabric free (easy clean) approved by USDA/FDA and NSF.

“If you want unbeatable value, then you need a Titan!”

TITAN MEGA PACKERS

The same detail and ingenuity that has made the Titan slicer limited a world leader in meat, fish and dairy slicers is now applied to carton packaging technology. The Titan Mega Packer offers fully automatic, single person operation, and is capable of erecting, packaging and sealing over 500 cartons per hour.

THE KEY BENEFITS OF TITAN MEGA PACKERS:

- One person operation from erecting, packing and sealing
- One shot operation
- Payback Period > 6 months
- Carton erector output is 500 cartons per hour
- Fully automatic carton erector capable of accommodating a wide variety of cartons
- Cartons are sealed on the underside by a hot melt glue unit. This gives the carton rigidity and reliability in a low temperature environment.
- Cartons are check weighed to meet minimum weight requirements while taking into account the tare weight of the carton. Therefore removing human error and assuring that no under packs are supplied.
- Check-weighing unit is accurate within 1 gram.
- Product data, output data is captured and can be exported to an Excel spreadsheet via your local network.
- Ask about how to get a **FREE Titan Mega Packer**
