

TITAN 500 BACON SLICER

Unmatched Hygiene, Power, Precision and Versatility

Increase your bacon slicing throughput, yields and slice quality using the world leading technology from Titan.

The all new Titan 500 Bacon Slicing System provides a unique electronic adjustment that controls the pack weight on the fly as it is being sliced. It gives you 'on weight' packs every time without the need for cumbersome expensive vision systems. It also allows you to produce perfect slices from 0.5 to 50 mm at speeds up to 2,000 RPM.

The Titan operator interface touch screen controls will add to your simplicity and efficiency by quickly assisting product and presentation changeovers. The state-of-the-art motion controlled system also adjusts pre-sliced product, both vertically and horizontally, for ideal slicing position and flawless transfer onto conveyors.

TITAN 500 KEY FEATURES

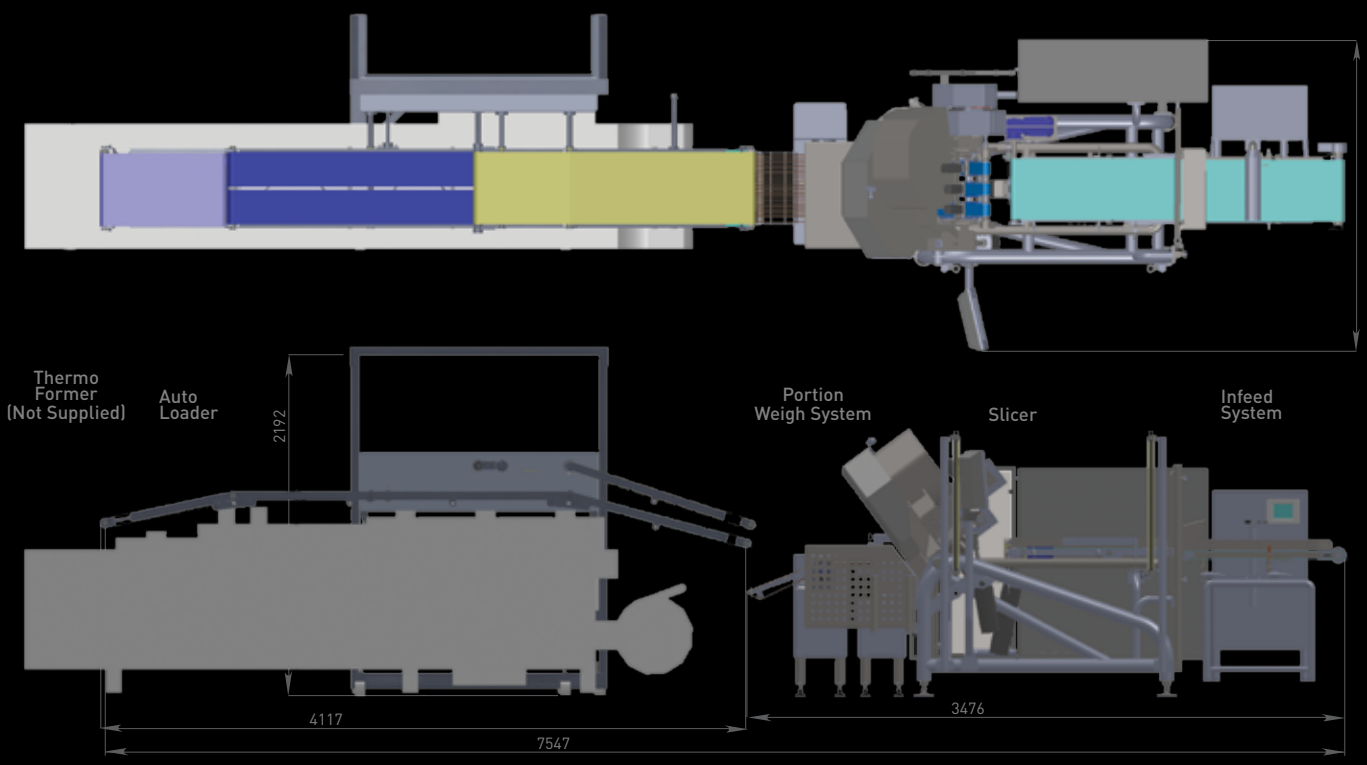

- 2000 slices per minute
- Slice thickness from 0.25 to 50.00 mm
- Product temperature range -20°C to +3°C
- Automatic portion making system for consistent portion sizes, plus or minus 1 percent
- Round pressurised frame for the best hygiene
- 380 mm (16 inch) x 160 mm (6 inch) slicing aperture - making it the widest throat available!
- 1000 mm long product or endless. Continuous feed gripper can be customised to any length
- Automatic loading for increased throughput
- Automatic CIP (clean-in-place) available
- Vision modules for grading that bolt on, so no engineering is required to add a camera
- On board sharpening supplied as standard
- Internet and LAN capable for servicing and exporting of production data
- No specific tools required cleaning
- Barrier free safety and hygiene features

Choose the Titan 500 with or without Gripper.

The versatile continuous feed gripper add-on can be custom made to any length further enhancing productivity.

"The slicer with the smallest footprint and the biggest throat on the market today"

"If you want unbeatable value, then you need a Titan!"
